

SECTION 1 — IMPORT-READY SOURCE FILE

AP World History: Modern Free-Response Practice Exam 2

APWH-SAQ2-001

Section: SAQ

Type: written

Unit: Unit 2 — Networks of Exchange

Period: c. 1200–1450

Theme: CDI — Cultural Developments and Interactions

Historical Reasoning: Mixed Historical Reasoning

Source Type: Secondary text source

Prompt:

Source 1: Historian Mariam al-Khatib, “Learning and Exchange across the Sahara,” modern historical interpretation, 2019.

“Trans-Saharan networks were not simply routes for gold, salt, and enslaved people. They also carried scholars, books, legal ideas, and religious practices. Cities such as Timbuktu and Gao became important because commercial exchange and Islamic learning reinforced one another.”

Source 2: Historian Daniel Mercer, “States of the Western Sudan,” modern historical interpretation, 2022.

“The growth of states in West Africa depended on rulers’ ability to tax and protect trade. Islam could strengthen royal legitimacy, but the wealth of states such as Mali came primarily from controlling commercial routes and resources rather than from cultural exchange alone.”

- (a) Identify one difference between the two historians’ interpretations of trans-Saharan networks.
- (b) Describe one specific historical development that could be used to support one of the interpretations.
- (c) Explain one way trans-Saharan networks were similar to or different from another exchange network during c. 1200–1450.

Scoring Guide:

Total Points: 3

- (a) 1 point: Identifies a clear difference between the interpretations, such as Source 1 emphasizing cultural and religious exchange while Source 2 emphasizes state power, taxation, and control of trade.
- (b) 1 point: Describes a relevant development, such as the growth of Mali, Mansa Musa’s pilgrimage, the spread of Islam in West Africa, Timbuktu’s scholarly community, gold-salt trade, caravan routes, or rulers’ taxation of merchants.
- (c) 1 point: Explains a valid similarity or difference with another network, such as the Indian Ocean, Silk Roads, Mediterranean, or Swahili Coast, using specific evidence about merchants, states, religion, technology, or goods.

Model Guidance:

A strong answer should avoid treating trans-Saharan trade as only an economic system or only a religious exchange. The best responses explain how commerce, scholarship, and political authority could reinforce one another. For part (c), a strong comparison names another network and explains a specific similarity or difference, such as the role of monsoon winds in the Indian Ocean or the role

of caravan technology in Saharan travel.

Expected Points:

3

APWH-SAQ2-002

Section: SAQ

Type: written

Unit: Unit 5 — Revolutions

Period: c. 1750–1900

Theme: SIO — Social Interactions and Organization

Historical Reasoning: Sourcing / POV / Purpose / Audience

Source Type: Primary text source

Prompt:

Source: Petition from free people of color in a Caribbean port city to a colonial assembly, 1791.

This excerpt is original but modeled on petitions from the era of Atlantic revolutions.

“We have paid taxes, served in the militia, purchased property, and defended this colony in moments of danger. Yet men who have done none of these things claim rights that are denied to us because of ancestry and complexion. We do not ask for disorder, nor do we seek to overturn property. We ask that the principles now spoken of in the empire—liberty, citizenship, and equal law—be applied to loyal subjects who have proven their usefulness.”

(a) Identify the likely audience of the petition.

(b) Explain how the petition reflects one broader idea associated with Atlantic revolutions.

(c) Explain one limitation of the petition as evidence for the goals of all people living in Caribbean colonial societies.

Scoring Guide:

Total Points: 3

(a) 1 point: Identifies a plausible audience, such as a colonial assembly, imperial officials, white property-holding elites, or political authorities responsible for citizenship and legal rights.

(b) 1 point: Explains a broader revolutionary idea reflected in the petition, such as natural rights, equality before the law, citizenship, representative government, or challenges to inherited legal privilege.

(c) 1 point: Explains a valid limitation, such as the petition representing free property-holding people of color rather than enslaved people, women, poor laborers, or all colonized groups, or noting that the petition defends property and order rather than calling for full social revolution.

Model Guidance:

A strong response should use the source’s point of view. The petitioners present themselves as loyal, property-owning, taxpaying, and useful because they are trying to persuade authorities.

Strong answers should also recognize that Atlantic revolutionary language could be used by different groups for different goals, and that not all groups sought the same degree of social change.

Expected Points:

3

APWH-SAQ2-003

Section: SAQ

Type: written

Unit: Unit 7 — Global Conflict

Period: c. 1900–present

Theme: GOV — Governance

Historical Reasoning: Causation

Source Type: Non-text source

Prompt:

Source: Description of a political map of the eastern Mediterranean and Middle East, produced for a European newspaper in 1922.

The map shows the former Ottoman territories divided into new zones after World War I. Anatolia is labeled “Turkish National Government,” while Syria and Lebanon are shaded as a French mandate. Iraq, Transjordan, and Palestine are shaded as British mandates. The map marks new borders, railway lines, oil fields near Mosul, and port cities along the eastern Mediterranean. A caption below the map states: “The settlement of the Ottoman lands after the Great War: mandates, resources, and routes.”

- (a) Identify one political change shown in the described map.
- (b) Explain one way World War I contributed to the political changes shown in the map.
- (c) Explain one way the settlement shown in the map could have contributed to later regional tensions.

Scoring Guide:

Total Points: 3

- (a) 1 point: Identifies a political change, such as the breakup of the Ottoman Empire, the creation of mandate territories, new borders, European control over former Ottoman lands, or the emergence of a Turkish nationalist government.
- (b) 1 point: Explains how World War I contributed to the changes, such as Ottoman defeat, Allied wartime agreements, peace settlements, European strategic interests, or the use of mandates under the League of Nations.
- (c) 1 point: Explains a valid later tension, such as borders that grouped diverse communities, foreign control over strategic routes or oil, competing nationalist claims, resentment toward mandates, or conflict over Palestine.

Model Guidance:

A strong response should connect the map’s visual details to historical causation. The oil fields, railways, ports, mandate labels, and borders all suggest that the postwar settlement involved both political restructuring and strategic interests. Strong answers should avoid saying only that “new countries were created” and should explain why the settlement produced conflict or resentment.

Expected Points:

3

APWH-DBQ2-001

Section: DBQ

Type: written

Unit: Unit 6 — Consequences of Industrialization

Period: c. 1750–1900

Theme: ECN — Economic Systems

Historical Reasoning: Continuity and Change Over Time

Source Type: Seven-document set

Prompt:

Evaluate the extent to which abolition and emancipation transformed labor systems in the Atlantic and Indian Ocean worlds during the nineteenth century.

Document 1

Author/Origin/Year/Place: Testimony of Joseph Martin, formerly enslaved dockworker, to a colonial labor commission, 1840, Bridgetown, Barbados.

Source Type: Testimony.

“Freedom has changed the name by which the planter calls us, but the estate still controls much of our time. Some men rent small plots and work for wages when they choose, but others must accept the planter’s terms because the best land remains in the hands of the old masters. We no longer fear the whip as before, yet hunger can compel a man nearly as strongly.”

Sourcing cues: Formerly enslaved worker speaking after emancipation; emphasizes lived experience and the limits of formal freedom.

Document 2

Author/Origin/Year/Place: Letter from a Cuban sugar planter to a business partner, 1866, Matanzas, Cuba.

Source Type: Private business letter.

“The talk of abolition grows louder each year, and the price of field hands has become uncertain. Our mills cannot stand idle. If Africans cannot be obtained as before, we must look to contract laborers, machines, and stricter accounting of every hour worked. Sugar rewards discipline, not sentiment.”

Sourcing cues: Plantation owner concerned with profits; reveals elite attempts to preserve plantation production despite pressure against slavery.

Document 3

Author/Origin/Year/Place: Recruitment notice posted by a labor contractor near Calcutta, 1874, British India.

Source Type: Recruitment notice.

“Men and women willing to work overseas may sign contracts for five years on plantations in Mauritius, Natal, or the Caribbean. Passage will be provided. Wages, rations, and return passage after the term shall be recorded before the magistrate. Workers must obey plantation rules during the period of contract.”

Sourcing cues: Official-style recruitment language; presents indenture as contractual while minimizing power imbalance and coercive conditions.

Document 4

Author/Origin/Year/Place: Colonial migration report, 1838–1880.

Source Type: Plain-text data table.

Selected Contract Labor Migration after Emancipation, 1838–1880

Destination	Colony	Main Origin of Workers	Approximate Pattern	Described
Mauritius	India	Large plantation labor migration after slavery ended		
British Guiana	India	Sugar estates expanded indentured workforce		

Trinidad India Contract workers used on sugar plantations
Natal India Workers recruited for plantations and public works
Cuba China and Yucatán Contract labor used alongside slavery and wage labor
Peru China Workers recruited for plantations, railways, and guano extraction

Note on the table: Contracts often promised wages and return passage, but workers frequently faced debt, restrictions on movement, and harsh discipline.

Sourcing cues: Colonial administrative data; useful for identifying large-scale labor movements but less detailed about workers' personal experiences.

Document 5

Author/Origin/Year/Place: Decree issued by the Sultan of Zanzibar under British diplomatic pressure, 1897, Zanzibar.

Source Type: Government decree.

“Any person held as a slave within the dominions of Zanzibar may present a claim before the proper authority and receive a certificate of freedom. No person shall be newly bought or sold. Former masters may retain lawful property, but they may not compel freed persons to remain without agreement.”

Sourcing cues: Government decree shaped by outside pressure; shows formal legal change but may not reveal enforcement on plantations or in households.

Document 6

Author/Origin/Year/Place: Described photograph from a sugar estate, Mauritius, c. 1890.

Source Type: Described photograph.

The photograph shows rows of cane workers standing beside a narrow-gauge rail line used to move cane to a mill. Most workers wear simple cotton clothing and hold cutting tools. A European estate manager stands apart on horseback near a ledger clerk. In the background are barracks-like worker housing and a smoking mill chimney.

Sourcing cues: Visual evidence of plantation organization after emancipation; shows hierarchy, industrial machinery, and disciplined field labor but not workers' voices.

Document 7

Author/Origin/Year/Place: Report by an East African merchant to a coastal commercial council, 1888, Mombasa.

Source Type: Commercial report.

“Caravan labor is harder to secure since foreign patrols and new regulations interfere with the old traffic in captives. Ivory, cloves, and grain still require carriers, porters, and household servants. Some freed persons now hire themselves by the month, but many remain tied to patrons through debt, marriage arrangements, or protection.”

Sourcing cues: Merchant perspective from a changing Indian Ocean economy; focuses on labor supply and commercial continuity rather than moral reform.

Scoring Guide:

Total Points: 7

Thesis / Claim — 1 point: Earns the point by making a historically defensible claim that evaluates the extent to which abolition and emancipation transformed nineteenth-century labor systems. A strong thesis should establish a line of reasoning, such as arguing that legal slavery declined but coercive plantation, contract, debt, and dependent labor systems continued in new forms.

Contextualization — 1 point: Earns the point by describing a broader historical context relevant to abolition and labor change, such as Enlightenment ideas, Atlantic revolutions, slave resistance, British abolitionism, industrial capitalism, plantation commodity production, imperial expansion, or the growth of global demand for sugar, cotton, guano, cloves, and other commodities.

Evidence from the Documents — 2 points: Earns 1 point by accurately using the content of at least three documents to address the prompt. Earns 2 points by using at least six documents to support an argument about legal emancipation, plantation continuity, indentured migration, contract labor, debt, wage labor, imperial pressure, or changing labor control.

Evidence Beyond the Documents — 1 point: Earns the point by using at least one specific piece of relevant outside evidence not found in the documents, such as the Haitian Revolution, the British abolition of the slave trade in 1807, British emancipation in 1833, the apprenticeship system, Brazilian abolition in 1888, Russian serf emancipation, Indian indentured labor in Fiji, anti-slavery naval patrols, or abolitionist religious movements.

Sourcing / Analysis of Documents — 1 point: Earns the point by explaining how or why the point of view, purpose, audience, or historical situation of at least three documents is relevant to the argument. Effective examples include explaining why former enslaved workers emphasized incomplete freedom, why planters looked for replacement labor, why recruitment notices made indenture appear orderly, why decrees may show formal law more than enforcement, or why merchants focused on labor supply rather than human rights.

Complexity — 1 point: Earns the point by demonstrating a more complex understanding of labor transformation. This may include explaining regional variation between the Atlantic and Indian Ocean worlds, distinguishing legal status from actual working conditions, showing how abolition was shaped by both moral reform and economic interests, or analyzing how industrial and plantation capitalism adapted to the end of legal slavery.

Model Guidance:

A strong DBQ could argue that abolition transformed labor by ending or weakening legal slave ownership in many regions, but that plantation owners, merchants, and imperial states developed new systems of labor control, including indenture, wage dependency, debt, and contract restrictions. Documents 1, 5, and 7 are useful for showing partial change and limits of freedom. Documents 2, 3, 4, and 6 help show continuity in plantation production and the rise of migrant contract labor. Outside evidence could include the Haitian Revolution, British emancipation, apprenticeship, Brazilian abolition, or Indian indentured migration to Fiji and the Caribbean. Strong sourcing might analyze the interests of planters, the promotional purpose of recruitment notices, the limits of government decrees, and the perspective of formerly enslaved workers.

Expected Points:

7

APWH-LEQ2-001

Section: LEQ

Type: written

Unit: Unit 8 — Cold War and Decolonization

Period: c. 1900–present

Theme: GOV — Governance

Historical Reasoning: Comparison

Source Type: Broad historical prompt with introductory statement

Prompt:

During the twentieth century, anti-colonial movements challenged European and Japanese imperial

rule in many regions. Some movements used petitions, political parties, international diplomacy, strikes, and mass protest, while others used armed struggle, guerrilla warfare, or alliances with Cold War powers.

Compare the methods used by anti-colonial movements in two regions during the period c. 1900 to the present.

Scoring Guide:

Total Points: 6

Thesis / Claim — 1 point: Earns the point by making a historically defensible claim that compares methods used by anti-colonial movements in two regions during c. 1900 to the present. A strong thesis should identify both a similarity and/or a difference and establish a line of reasoning.

Contextualization — 1 point: Earns the point by describing a broader context relevant to anti-colonial movements, such as imperial rule before World War II, the effects of World War I or World War II, Wilsonian self-determination, the Russian Revolution, Japanese occupation in Asia, the Cold War, the United Nations, or the weakening of European empires.

Evidence — 2 points: Earns 1 point by identifying at least two specific pieces of relevant evidence, such as the Indian National Congress, Gandhi's noncooperation campaigns, Vietnamese resistance to France, the Algerian FLN, the Mau Mau rebellion, Ghana's Convention People's Party, Indonesian nationalism, Pan-Africanism, or the Bandung Conference. Earns 2 points by using at least two pieces of evidence to support a comparison of methods.

Historical Reasoning — 1 point: Earns the point by using comparison to explain similarities and/or differences in anti-colonial methods. A strong response might compare mass civil disobedience with guerrilla warfare, political negotiation with revolutionary violence, or international diplomacy with local mobilization.

Complexity — 1 point: Earns the point by demonstrating a nuanced understanding of anti-colonial methods. This may include explaining that many movements combined multiple methods, that imperial responses shaped nationalist strategies, that Cold War pressures affected tactics, or that social groups within the same movement disagreed over violence, negotiation, class goals, or postcolonial political visions.

Model Guidance:

A strong LEQ should compare two regions clearly rather than narrating one independence movement at a time. Useful evidence might include India and noncooperation, Vietnam and armed struggle, Algeria and guerrilla war, Ghana and party politics, Kenya and rural rebellion, Indonesia and diplomacy combined with conflict, or Pan-African and international organizing. The strongest responses explain why methods differed, such as differences in settler colonialism, imperial repression, wartime occupation, leadership, social base, or Cold War context.

Expected Points:

6

SECTION 2 — SERIES DO-NOT-REPEAT BANK UPDATE — DO NOT IMPORT

SERIES DO-NOT-REPEAT BANK UPDATE — APWH-FRQ2

· APWH-SAQ2-001: Unit 2 — Networks of Exchange; c. 1200–1450; West Africa, North Africa, Sahara, and possible comparison to Indian Ocean, Silk Roads, Mediterranean, or Swahili Coast; secondary text source with two modern historians; source perspectives contrast cultural/religious exchange and scholarly networks with state control of trade, taxation, and resources; historical development is trans-Saharan exchange, Mali, Timbuktu, Islam, gold-salt trade, and caravan routes; reasoning path analyzes competing interpretations and compares networks; misconception targeted: trans-Saharan networks were only about gold and salt or only about Islam.

· APWH-SAQ2-002: Unit 5 — Revolutions; c. 1750–1900; Caribbean colonial society in the

Atlantic revolutionary era; primary text source is an original petition from free people of color to colonial authorities; source perspective is property-holding free people of color using loyalty, taxation, militia service, and revolutionary rights language to demand legal equality; historical development is Atlantic revolutionary ideology and contested citizenship in slave societies; reasoning path focuses on audience, purpose, and limitations of representative perspective; misconception targeted: all revolutionary groups in Atlantic societies had identical goals or supported full social equality.

· APWH-SAQ2-003: Unit 7 — Global Conflict; c. 1900–present; eastern Mediterranean and Middle East after World War I; non-text source type is a described political map of former Ottoman territories; visual/data/map pattern shows mandates, new borders, oil fields, railways, ports, and Turkish nationalist territory; historical development is Ottoman collapse, League of Nations mandates, European strategic interests, and postwar border-making; reasoning path is causation from World War I to political restructuring and later regional tensions; misconception targeted: mandate borders were neutral administrative changes without imperial or strategic interests.

· APWH-DBQ2-001: Unit 6 — Consequences of Industrialization; c. 1750–1900; Atlantic and Indian Ocean worlds including Barbados, Cuba, India, Mauritius, British Guiana, Trinidad, Natal, Peru, Zanzibar, and East Africa; DBQ topic is abolition, emancipation, and transformation or continuity of labor systems in the nineteenth century; document types include formerly enslaved worker testimony, planter letter, labor recruitment notice, contract labor migration table, government decree, described plantation photograph, and East African merchant report; document perspectives include freed workers, planters, recruiters, colonial administrators, imperial-influenced rulers, estate managers, and merchants; main argument paths include legal emancipation, persistence of plantation production, indentured migration, wage dependency, contract restrictions, debt ties, and regional variation; outside evidence possibilities include Haitian Revolution, British abolition of slave trade, British emancipation, apprenticeship, Brazilian abolition, Russian serf emancipation, Indian indenture to Fiji, anti-slavery patrols, and abolitionist religious movements; sourcing opportunities include planter profit motive, promotional recruitment language, limits of legal decrees, former enslaved perspective, and merchant concern with labor supply.

· APWH-LEQ2-001: Unit 8 — Cold War and Decolonization; c. 1900–present; comparative regions may include South Asia, Southeast Asia, North Africa, Sub-Saharan Africa, and the Middle East; LEQ topic is methods used by anti-colonial movements; historical reasoning process is comparison; evidence categories include Indian National Congress, Gandhi's noncooperation, Vietnamese resistance, Algerian FLN, Mau Mau rebellion, Ghana's Convention People's Party, Indonesian nationalism, Pan-Africanism, Bandung Conference, United Nations appeals, strikes, petitions, political parties, guerrilla warfare, and Cold War alliances; complexity path compares nonviolent mass mobilization, negotiation, armed struggle, international diplomacy, and mixed strategies while explaining how imperial response, settler colonialism, wartime occupation, leadership, and Cold War pressures shaped methods; misconception targeted: anti-colonial movements used one uniform strategy or simply received independence without local organization and conflict.
