

## SECTION 1 — IMPORT-READY SOURCE FILE

### AP World History: Modern Free-Response Practice Exam 6

APWH-SAQ6-001

Section: SAQ

Type: written

Unit: Unit 1 — The Global Tapestry

Period: c. 1200–1450

Theme: ENV — Humans and the Environment

Historical Reasoning: Mixed Historical Reasoning

Source Type: Secondary text source

Prompt:

Source 1: Historian Dara Chansok, “Water and Kingship at Angkor,” modern historical interpretation, 2019.

“The power of Angkor’s rulers depended heavily on their ability to organize water. Reservoirs, canals, and rice fields did not merely support agriculture; they made kingship visible. Control over water linked political authority, religious symbolism, and the labor of thousands of common people.”

Source 2: Historian Michael Tan, “Maritime Southeast Asia before 1450,” modern historical interpretation, 2022.

“In Southeast Asia, political power was not built only through inland agriculture. Maritime states and port cities gained influence by managing trade, welcoming foreign merchants, and adopting cultural practices from South Asia and the Islamic world. Their flexibility made them powerful in a region connected by water.”

(a) Identify one difference between the two historians’ interpretations of state power in Southeast Asia.

(b) Describe one specific historical development that could be used to support one of the interpretations.

(c) Explain one way Southeast Asian state-building during c. 1200–1450 was similar to or different from state-building in another region during the same period.

Scoring Guide:

Total Points: 3

(a) 1 point: Identifies a clear difference between the interpretations, such as Source 1 emphasizing inland hydraulic agriculture and sacred kingship while Source 2 emphasizes maritime trade, port cities, merchant networks, and cultural flexibility.

(b) 1 point: Describes a relevant development, such as Angkor’s reservoirs and canals, rice agriculture, Hindu-Buddhist temple complexes, Srivijaya or Majapahit maritime influence, port cities, Indian Ocean trade, merchant communities, or the spread of Islam in maritime Southeast Asia.

(c) 1 point: Explains a valid similarity or difference with another region, such as Song China, Mali, the Delhi Sultanate, the Swahili Coast, or the Islamic world, using specific evidence about agriculture, trade, religion, bureaucracy, environment, or political legitimacy.

Model Guidance:

A strong answer should show that Southeast Asian state-building included both inland agrarian systems and maritime commercial systems. The best responses use specific evidence rather than treating the region as one uniform model. For part (c), strong answers should name another region and compare a concrete basis of state power, such as irrigation, trade taxation, religious legitimacy, military force, or elite cooperation.

Expected Points:

3

APWH-SAQ6-002

Section: SAQ

Type: written

Unit: Unit 5 — Revolutions

Period: c. 1750–1900

Theme: TEC — Technology and Innovation

Historical Reasoning: Sourcing / POV / Purpose / Audience

Source Type: Primary text source

Prompt:

Source: Memorandum from a Russian railway engineer to the Ministry of Finance, St. Petersburg, 1893. This excerpt is original but modeled on late nineteenth-century Russian reform and industrialization proposals.

“The empire cannot remain secure while grain, soldiers, coal, and manufactured goods move slowly across such vast distances. A railway through Siberia will strengthen the treasury, bind distant provinces to the center, and attract settlement where land lies underused. Foreign machines and loans may be necessary at first, but the goal must be Russian industry serving Russian power. Peasants who become workers must be disciplined, housed, and taught the habits of factory labor.”

(a) Identify the likely purpose of the memorandum.

(b) Explain how the memorandum reflects one goal of Russian state-led industrialization in the late nineteenth century.

(c) Explain one limitation of the memorandum as evidence for the experiences of workers or peasants in industrializing Russia.

Scoring Guide:

Total Points: 3

(a) 1 point: Identifies a plausible purpose, such as persuading the Ministry of Finance to support railway construction, state-led industrialization, Siberian settlement, military mobility, or the use of foreign loans and technology.

(b) 1 point: Explains a relevant Russian industrialization goal, such as strengthening the empire, improving transportation, expanding heavy industry, increasing state revenue, integrating frontier regions, moving troops, or reducing dependence on foreign industry.

(c) 1 point: Explains a valid limitation, such as the source representing an official or technical elite perspective rather than workers, peasants, migrants, women, ethnic minorities, or political radicals; or noting that it presents industrialization as useful to the state while minimizing labor exploitation or social unrest.

Model Guidance:

A strong response should use the author’s point of view as a state-oriented technical expert. The memorandum links railways and industry to imperial strength, not simply to economic growth.

Strong answers should also recognize that the source tells us more about elite planning than about

the lived experience of peasants becoming factory workers or settlers.

Expected Points:

3

APWH-SAQ6-003

Section: SAQ

Type: written

Unit: Unit 8 — Cold War and Decolonization

Period: c. 1900–present

Theme: GOV — Governance

Historical Reasoning: Contextualization

Source Type: Non-text source

Prompt:

Source: Description of a conference hall seating chart and mural for a meeting of non-aligned states, Belgrade, 1961.

The seating chart places delegations from Asia, Africa, the Middle East, Latin America, and Europe in a wide semicircle rather than in two opposing blocs. At the front is a mural showing a broken chain, a dove, a factory, a school, and a globe without military alliances marked on it. The conference program lists discussion topics: “peaceful coexistence,” “economic development,” “anti-colonial solidarity,” “nuclear disarmament,” and “sovereign equality.”

- (a) Identify one goal of non-aligned states suggested by the described source.
- (b) Explain how the source reflects the broader Cold War context.
- (c) Explain one way the Non-Aligned Movement differed from a formal military alliance during the Cold War.

Scoring Guide:

Total Points: 3

- (a) 1 point: Identifies a valid goal, such as avoiding domination by either Cold War bloc, promoting sovereignty, supporting decolonization, pursuing economic development, opposing nuclear weapons, encouraging peaceful coexistence, or increasing diplomatic influence for newly independent states.
- (b) 1 point: Explains a relevant Cold War context, such as U.S.-Soviet rivalry, military alliances, nuclear arms competition, decolonization, superpower pressure on new states, or the desire of postcolonial leaders to gain aid without losing autonomy.
- (c) 1 point: Explains a valid difference, such as the Non-Aligned Movement being a diplomatic and political grouping rather than a mutual-defense pact, including states with diverse ideologies, refusing automatic alignment with NATO or the Warsaw Pact, or emphasizing sovereignty and development rather than collective military command.

Model Guidance:

A strong response should interpret the seating chart and mural as political symbolism. The semicircle, broken chain, dove, school, factory, and unmarked globe all point to independence from bloc politics and an agenda broader than military strategy. Strong answers should avoid saying non-aligned states were “neutral” in every issue; many actively pursued diplomatic, economic, and anti-colonial goals.

Expected Points:

3

APWH-DBQ6-001

Section: DBQ

Type: written

Unit: Unit 7 — Global Conflict

Period: c. 1900–present

Theme: SIO — Social Interactions and Organization

Historical Reasoning: Causation

Source Type: Seven-document set

Prompt:

Evaluate the extent to which mass violence in the period from c. 1914 to 1950 encouraged new ideas about international humanitarian action and legal responsibility.

Document 1

Author/Origin/Year/Place: Letter from an Armenian relief worker to a charitable committee, 1916, Aleppo.

Source Type: Relief worker letter.

“Children arrive without parents, and women tell of marches through desert roads where hunger and guards killed many before they reached the city. Local charity alone cannot answer such suffering. We need money, doctors, orphan shelters, and foreign witnesses who will record what happened, for silence will make the dead disappear a second time.”

Sourcing cues: Relief worker responding to wartime deportations and massacres; emphasizes humanitarian aid and documentation.

Document 2

Author/Origin/Year/Place: Statement by an Ottoman provincial official to the Interior Ministry, 1916, Anatolia.

Source Type: Government report.

“The relocation orders were issued during war, when rebellion and foreign invasion threatened the state. Officials in the provinces must keep transport orderly and prevent disorder by soldiers, tribesmen, or hungry villagers. The empire cannot survive if security measures are judged by sentimental language from outsiders who do not understand wartime necessity.”

Sourcing cues: Government official defending wartime policy; emphasizes state security and rejects outside criticism.

Document 3

Author/Origin/Year/Place: Description of an international relief poster, 1921, New York.

Source Type: Described poster.

The poster shows a thin child standing beside an empty bowl, with ruined buildings behind him. A map in the corner marks “Near East,” “Caucasus,” and “Anatolia.” The text reads: “They Have No Country but Need Your Help: Food, Medicine, Shelter.” At the bottom, donors are asked to contribute through churches, schools, and civic clubs.

Sourcing cues: Fundraising image aimed at foreign civilians; uses emotional imagery to mobilize humanitarian donations.

#### Document 4

Author/Origin/Year/Place: Memo from a League of Nations refugee office, 1926, Geneva.

Source Type: International organization memorandum.

“Thousands remain without recognized nationality, passports, or secure work. Relief cannot depend indefinitely on private charity. States must accept travel documents, permit employment, and cooperate in resettlement. A person without papers becomes vulnerable to every border guard, employer, and police office.”

Sourcing cues: International organization perspective; frames displacement as a legal and administrative problem requiring state cooperation.

#### Document 5

Author/Origin/Year/Place: Diary entry by a Chinese medical volunteer after mass violence in Nanjing, 1938.

Source Type: Diary excerpt.

“The hospital corridors are full. Some foreign residents have made safety zones and try to record the names of the dead and injured, but they cannot stop the soldiers everywhere. The wounded ask whether anyone outside China will hear of this. I do not know. I only know that the world has learned to send reporters faster than it sends protection.”

Sourcing cues: Local medical perspective during wartime atrocity; contrasts documentation with limited protection.

#### Document 6

Author/Origin/Year/Place: Summary table prepared by a legal research committee, 1946, London.

Source Type: Plain-text data table.

#### Selected Postwar Legal Concepts Discussed after World War II

| Concept Discussed            | Problem It Attempted to Address                           |
|------------------------------|-----------------------------------------------------------|
| Crimes against civilians     | Violence directed at noncombatant populations             |
| Individual responsibility    | Officials claiming they only followed state orders        |
| International tribunals      | Atrocities committed inside or across national borders    |
| Refugee protections          | People displaced or made stateless by war and persecution |
| Genocide as a legal category | Destruction of groups because of identity                 |

Note on the table: The committee argued that older ideas of state sovereignty were inadequate when governments or armies organized mass violence against civilian populations.

Sourcing cues: Legal committee perspective after World War II; emphasizes law, categories, and accountability.

#### Document 7

Author/Origin/Year/Place: Speech by a delegate from a newly independent Asian state to the United Nations, 1949, Lake Success, New York.

Source Type: Diplomatic speech.

“Human rights must not become a phrase used only after Europe suffers. Asia, Africa, and the Middle East have also known massacres, forced labor, famine, and racial humiliation. If

international law is to be just, it must protect all peoples and must not become a tool by which powerful states condemn enemies while ignoring friends.”

Sourcing cues: Diplomat from a recently decolonized state; supports human rights but warns against selective enforcement and unequal power.

Scoring Guide:

Total Points: 7

Thesis / Claim — 1 point: Earns the point by making a historically defensible claim that evaluates the extent to which mass violence from c. 1914 to 1950 encouraged new ideas about international humanitarian action and legal responsibility. A strong thesis should establish a line of reasoning, such as arguing that mass violence expanded humanitarian relief, refugee protections, documentation efforts, and legal accountability while also revealing the limits of sovereignty, enforcement, and unequal power.

Contextualization — 1 point: Earns the point by describing a broader historical context relevant to mass violence and humanitarian/legal responses, such as World War I, the collapse of empires, nationalism, total war, population displacement, the League of Nations, World War II, the Holocaust, Japanese imperial expansion, decolonization, or the creation of the United Nations.

Evidence from the Documents — 2 points: Earns 1 point by accurately using the content of at least three documents to address the prompt. Earns 2 points by using at least six documents to support an argument about humanitarian relief, documentation, refugee protection, state security claims, international organizations, legal accountability, or unequal enforcement.

Evidence Beyond the Documents — 1 point: Earns the point by using at least one specific piece of relevant outside evidence not found in the documents, such as the Armenian genocide, Nansen passports, the Holocaust, Nuremberg Trials, Tokyo Trials, Raphael Lemkin, the Genocide Convention, the Universal Declaration of Human Rights, the United Nations, or the partition of India and Pakistan.

Sourcing / Analysis of Documents — 1 point: Earns the point by explaining how or why the point of view, purpose, audience, or historical situation of at least three documents is relevant to the argument. Effective examples include explaining why relief workers emphasized witness and aid, why state officials justified violence through security language, why posters used emotional appeals, why international officials focused on documents and borders, or why diplomats from newly independent states warned against selective human rights enforcement.

Complexity — 1 point: Earns the point by demonstrating a more complex understanding of humanitarian and legal change. This may include explaining that mass violence encouraged new international norms but did not guarantee enforcement, that humanitarian action could document suffering without stopping it, that legal accountability challenged sovereignty, or that postwar human rights language was shaped by both European and non-European experiences.

Model Guidance:

A strong DBQ could argue that mass violence from World War I through World War II encouraged new forms of humanitarian relief, refugee administration, atrocity documentation, and legal accountability, but that these ideas remained limited by state sovereignty, wartime security claims, weak enforcement, and unequal global power. Documents 1, 3, and 4 can support arguments about relief and refugee protection. Documents 2 and 5 can support arguments about state violence, security claims, and the limits of documentation. Documents 6 and 7 can support arguments about new legal categories and human rights debates. Outside evidence could include the Holocaust, Nuremberg Trials, Raphael Lemkin, the Genocide Convention, Nansen passports, the UN, or the Universal Declaration of Human Rights. Strong sourcing should compare relief workers, state officials, international organizations, local medical workers, legal committees, and postcolonial diplomats.

Expected Points:

7

APWH-LEQ6-001

Section: LEQ

Type: written

Unit: Unit 6 — Consequences of Industrialization

Period: c. 1750–1900

Theme: SIO — Social Interactions and Organization

Historical Reasoning: Continuity and Change Over Time

Source Type: Broad historical prompt with introductory statement

Prompt:

From c. 1750 to 1900, industrial capitalism, imperial expansion, steam transportation, settler colonialism, famine, religious persecution, and changing labor markets shaped the movement of people across oceans and continents. Some migrants moved voluntarily, while others migrated under pressure from poverty, discrimination, state policy, or colonial expansion.

Evaluate the extent to which patterns of transregional migration changed in the period c. 1750 to 1900.

Scoring Guide:

Total Points: 6

Thesis / Claim — 1 point: Earns the point by making a historically defensible claim that evaluates the extent to which patterns of transregional migration changed from c. 1750 to 1900. A strong thesis should establish a line of reasoning about change, continuity, or both.

Contextualization — 1 point: Earns the point by describing a broader context relevant to migration, such as industrialization, imperial expansion, population growth, famine, settler colonialism, steamship travel, railroad expansion, anti-Semitism, labor demand in cities and frontier zones, or the decline of older coerced labor systems.

Evidence — 2 points: Earns 1 point by identifying at least two specific pieces of relevant evidence, such as Irish migration after the Great Famine, Italian migration to Argentina or the United States, Russian Jewish migration, Lebanese and Syrian merchant diasporas, European settler migration to Australia or New Zealand, Chinese merchant migration to Southeast Asia, Japanese migration to Hawaii, or rural-to-urban migration within industrializing regions. Earns 2 points by using at least two pieces of evidence to support an argument about change and/or continuity.

Historical Reasoning — 1 point: Earns the point by using continuity and change over time to explain how migration patterns changed and what older patterns continued. Strong responses might explain changes such as larger-scale oceanic migration, more steamship-assisted movement, settler colonial migration, and labor migration to industrial cities, while also noting continuities such as merchant diasporas, religious minority migration, family networks, and migrants facing discrimination.

Complexity — 1 point: Earns the point by demonstrating a nuanced understanding of migration. This may include explaining that migration could be voluntary and coerced in different degrees, that states encouraged some migrants while excluding others, that migrants created diaspora communities and remittances, or that receiving societies often depended on migrant labor while also producing racial, religious, or class-based backlash.

Model Guidance:

A strong LEQ should avoid treating migration as a single cause-and-effect pattern. Useful evidence might include Irish famine migration, Italian migration to the Americas, Russian Jewish migration, Lebanese and Syrian merchant diasporas, European settler migration to Australia or New Zealand, Chinese merchant communities in Southeast Asia, Japanese migration to Hawaii, and rural-to-urban

migration. The best responses will explain both change and continuity: migration expanded in scale and speed because of industrial transportation and global labor markets, but older patterns of diaspora, discrimination, family networks, and merchant mobility continued.

Expected Points:

6

## SECTION 2 — SERIES DO-NOT-REPEAT BANK UPDATE — DO NOT IMPORT

### SERIES DO-NOT-REPEAT BANK UPDATE — APWH-FRQ6

· APWH-SAQ6-001: Unit 1 — The Global Tapestry; c. 1200–1450; Southeast Asia / Angkor and maritime Southeast Asian states with possible comparison to Song China, Mali, Delhi Sultanate, Swahili Coast, or Islamic states; secondary text source with two modern historians; source perspectives contrast inland hydraulic agriculture, reservoirs, canals, rice production, sacred kingship, and labor mobilization with maritime trade, port cities, foreign merchants, and cultural flexibility; historical development is Southeast Asian state-building through environment, trade, and religious legitimacy; reasoning path compares interpretations of political power and environmental-commercial foundations; misconception targeted: Southeast Asian states followed only one model of inland temple kingship or only one model of maritime trade.

· APWH-SAQ6-002: Unit 5 — Revolutions; c. 1750–1900; Russian Empire / St. Petersburg, Siberia, railway expansion, and state-led industrialization; primary text source is an original memorandum from a Russian railway engineer to the Ministry of Finance; source perspective is a technical and state-oriented elite promoting railways, foreign machines, loans, settlement, military mobility, and disciplined factory labor; historical development is late tsarist industrialization, railway construction, frontier integration, and state modernization; reasoning path focuses on purpose, industrialization goals, and source limitation for workers and peasants; misconception targeted: industrialization outside Britain was purely private-market driven or automatically improved workers' lives.

· APWH-SAQ6-003: Unit 8 — Cold War and Decolonization; c. 1900–present; Non-Aligned Movement / Belgrade 1961 with delegations from Asia, Africa, Middle East, Latin America, and Europe; non-text source type is a described conference seating chart and mural; visual/data/map pattern includes semicircle seating, broken chain, dove, factory, school, unaligned globe, and agenda topics of peaceful coexistence, development, anti-colonial solidarity, nuclear disarmament, and sovereign equality; historical development is nonalignment as a diplomatic strategy during Cold War decolonization; reasoning path contextualizes Cold War bloc politics and distinguishes nonalignment from military alliances; misconception targeted: non-aligned states were passive, isolated, or simply neutral rather than active diplomatic actors.

· APWH-DBQ6-001: Unit 7 — Global Conflict; c. 1900–present; Ottoman Empire/Anatolia, Aleppo, United States-based relief networks, League of Nations Geneva, China/Nanjing, postwar London legal committees, United Nations, and newly independent Asian states; DBQ topic is mass violence from c. 1914 to 1950 encouraging new ideas about humanitarian action and legal responsibility; document types include Armenian relief worker letter, Ottoman provincial official report, described international relief poster, League refugee office memorandum, Chinese medical volunteer diary, legal research committee table, and postcolonial UN diplomatic speech; document perspectives include relief workers, state officials defending security policy, fundraising organizations, international refugee administrators, local medical volunteers, legal experts, and postcolonial diplomats; main argument paths include atrocity documentation, humanitarian relief, refugee protections, state security justifications, limits of protection, legal categories, individual responsibility, genocide, human rights, sovereignty, and selective enforcement; outside evidence possibilities include Armenian genocide, Nansen passports, Holocaust, Nuremberg Trials, Tokyo Trials, Raphael Lemkin, Genocide Convention, Universal Declaration of Human Rights, United Nations, and partition of India and Pakistan; sourcing opportunities include relief-worker witness

purpose, state-security justification, emotional poster fundraising, League administrative focus, local medical limits, legal categorization after WWII, and postcolonial critique of selective human rights enforcement.

· APWH-LEQ6-001: Unit 6 — Consequences of Industrialization; c. 1750–1900; transregional migration involving Ireland, Italy, Argentina, United States, Russian Empire, Jewish diasporas, Lebanese and Syrian merchant communities, Australia, New Zealand, Southeast Asia, Hawaii, and industrial cities; LEQ topic is changing patterns of transregional migration from c. 1750 to 1900; historical reasoning process is continuity and change over time; evidence categories include Irish famine migration, Italian migration to the Americas, Russian Jewish migration, Lebanese/Syrian merchant diasporas, European settler migration to Australia or New Zealand, Chinese merchant communities in Southeast Asia, Japanese migration to Hawaii, rural-to-urban migration, steamship travel, railroads, remittances, diaspora networks, and migrant discrimination; complexity path weighs increased scale, speed, and industrial labor demand against continuities in merchant diasporas, family networks, minority migration, coercive pressures, and discrimination; misconception targeted: nineteenth-century migration was either entirely voluntary opportunity-seeking or entirely coerced labor movement, rather than a spectrum shaped by industrialization, empire, transport, famine, persecution, and labor markets.
