

SECTION 1 — IMPORT-READY SOURCE FILE

AP World History: Modern Free-Response Practice Exam 8

APWH-SAQ8-001

Section: SAQ

Type: written

Unit: Unit 1 — The Global Tapestry

Period: c. 1200–1450

Theme: CDI — Cultural Developments and Interactions

Historical Reasoning: Mixed Historical Reasoning

Source Type: Secondary text source

Prompt:

Source 1: Historian Selam Tesfaye, “Christian Kingship in the Ethiopian Highlands,” modern historical interpretation, 2020.

“Solomonic Ethiopia’s rulers built authority through sacred genealogy, church patronage, monasteries, and monumental Christian culture. Political power in the highlands depended on presenting the king as defender of an ancient Christian kingdom surrounded by Muslim states and commercial rivals.”

Source 2: Historian Omar Haddad, “The Horn of Africa and Red Sea Connections,” modern historical interpretation, 2022.

“Medieval Ethiopia should not be understood only as an isolated Christian mountain kingdom. Its rulers, merchants, and religious leaders participated in Red Sea and Indian Ocean networks that linked the highlands to Egypt, Arabia, and the wider Islamic world through trade, diplomacy, and religious contact.”

- (a) Identify one difference between the two historians’ interpretations of medieval Ethiopia.
- (b) Describe one specific historical development that could be used to support one of the interpretations.
- (c) Explain one way Ethiopian state-building during c. 1200–1450 was similar to or different from state-building in another region during the same period.

Scoring Guide:

Total Points: 3

- (a) 1 point: Identifies a clear difference between the interpretations, such as Source 1 emphasizing Christian sacred kingship and church patronage while Source 2 emphasizes regional trade, diplomacy, and Red Sea connections.
- (b) 1 point: Describes a relevant development, such as the Solomonic dynasty, Ethiopian Orthodox Christianity, rock-hewn churches, monastic networks, claims of descent from Solomon, contact with Coptic Egypt, Red Sea trade, or interactions with Muslim trading states.
- (c) 1 point: Explains a valid similarity or difference with another region, such as Mali, the Delhi Sultanate, Song China, Southeast Asia, or the Swahili Coast, using specific evidence about religion, trade, environment, political legitimacy, or elite authority.

Model Guidance:

A strong answer should avoid treating Ethiopia as completely isolated or as only a trade society. The strongest responses recognize that Christian identity, sacred kingship, and regional connections

could all contribute to political authority. For part (c), strong responses should compare a concrete method of state-building, such as religious legitimacy, control of trade, environmental adaptation, or administrative organization.

Expected Points:

3

APWH-SAQ8-002

Section: SAQ

Type: written

Unit: Unit 4 — Transoceanic Interconnections

Period: c. 1450–1750

Theme: GOV — Governance

Historical Reasoning: Sourcing / POV / Purpose / Audience

Source Type: Primary text source

Prompt:

Source: Report from an Ottoman naval administrator in Algiers to officials in Istanbul, 1574. This excerpt is original but modeled on Ottoman Mediterranean administrative correspondence.

“The western sea remains unsettled. Spanish ships watch the coast, and corsair captains request powder, timber, and permission to recruit sailors from many towns. If the harbor is repaired and the fortress supplied, the sultan’s name will be honored from Tunis to the islands. Local notables must be treated with care, for they know the tribes and markets better than men sent from the capital. Yet without imperial guns and ships, loyalty here will be no stronger than the next fleet that appears offshore.”

(a) Identify the likely purpose of the report.

(b) Explain how the report reflects one challenge faced by maritime or gunpowder empires during c. 1450–1750.

(c) Explain one limitation of the source as evidence for the views of people living under Ottoman authority in North Africa.

Scoring Guide:

Total Points: 3

(a) 1 point: Identifies a plausible purpose, such as requesting supplies, urging harbor repairs, strengthening Ottoman naval power, warning about Spanish rivalry, or advising cooperation with local elites.

(b) 1 point: Explains a relevant challenge, such as maintaining distant coastal provinces, competing with European naval powers, supplying fortresses, integrating local elites, managing corsairs, controlling trade routes, or projecting authority across maritime spaces.

(c) 1 point: Explains a valid limitation, such as the source representing an Ottoman administrative and military perspective rather than merchants, sailors, enslaved captives, rural communities, women, religious minorities, or local opponents; or noting that it emphasizes imperial security while minimizing local grievances.

Model Guidance:

A strong response should use the author’s position as a naval administrator. The report is concerned with imperial security, local cooperation, and Mediterranean rivalry. Strong answers should connect the Ottoman example to broader early modern patterns of maritime competition without assuming that all North African communities experienced Ottoman rule in the same way.

Expected Points:

3

APWH-SAQ8-003

Section: SAQ

Type: written

Unit: Unit 7 — Global Conflict

Period: c. 1900–present

Theme: SIO — Social Interactions and Organization

Historical Reasoning: Causation

Source Type: Non-text source

Prompt:

Source: Description of a Soviet wartime factory poster, 1942.

The poster shows women operating metal lathes in a large factory while tanks roll out of the building in the background. A map on the wall marks railway lines leading east from cities labeled “Leningrad,” “Moscow,” and “Kharkiv” toward industrial centers beyond the Ural Mountains. A slogan reads: “Every Shift at the Machine Is a Blow against the Invader.” At the bottom, smaller text calls for “discipline, production, and sacrifice for victory.”

- (a) Identify one wartime development suggested by the described poster.
- (b) Explain one way total war affected societies during World War II.
- (c) Explain one way the poster reflects the relationship between government propaganda and wartime mobilization.

Scoring Guide:

Total Points: 3

- (a) 1 point: Identifies a valid wartime development, such as women’s industrial labor, factory mobilization, military production, relocation of industry, railway movement of resources, or civilian participation in war production.
- (b) 1 point: Explains a valid social effect of total war, such as expanded state control over labor, rationing, women’s participation in industry, civilian sacrifice, bombing and displacement, propaganda campaigns, mass conscription, or reorganization of economies for military needs.
- (c) 1 point: Explains how propaganda encouraged production, discipline, sacrifice, national unity, gendered participation, or support for the war effort by linking factory labor directly to military victory.

Model Guidance:

A strong response should interpret the poster as a tool of wartime mobilization, not as neutral evidence of factory life. The women workers, tanks, railway map, and slogan all connect civilian labor to military survival. Strong answers should explain how total war blurred the line between battlefield and home front.

Expected Points:

3

APWH-DBQ8-001

Section: DBQ

Type: written

Unit: Unit 9 — Globalization

Period: c. 1900–present

Theme: SIO — Social Interactions and Organization

Historical Reasoning: Continuity and Change Over Time

Source Type: Seven-document set

Prompt:

Evaluate the extent to which women's claims to political participation changed from c. 1900 to 1975.

Document 1

Author/Origin/Year/Place: Petition by members of a women's suffrage association to the New Zealand Parliament, 1893, Wellington.

Source Type: Political petition.

"Women obey the laws, pay taxes, raise children, teach in schools, and contribute to the moral welfare of the colony. A government that claims to represent the people cannot continue to exclude half of the adult population from the vote. We ask not for privilege but for equal citizenship."

Sourcing cues: Organized suffrage activists addressing lawmakers; frames voting rights as citizenship, morality, and representation.

Document 2

Author/Origin/Year/Place: Speech by Huda al-Masri, an Egyptian women's education advocate, at a public lecture, 1924, Cairo. This source is original but modeled on early twentieth-century Middle Eastern reform arguments.

Source Type: Public speech.

"A nation cannot demand independence from foreign rule while keeping its daughters dependent within the home. Education does not destroy family honor; ignorance does. If women are to raise citizens, manage charities, write, teach, and serve the nation, they must be recognized as participants in public life."

Sourcing cues: Urban educated reformer speaking after nationalist mobilization; links women's education and public participation to national independence.

Document 3

Author/Origin/Year/Place: Description of a women's labor poster issued by a textile union, 1936, Osaka.

Source Type: Described poster.

The poster shows a young woman standing between a loom and a ballot box. Behind her are crowded worker dormitories and a factory clock. The caption reads: "The Hands That Weave the Nation Deserve a Voice." Smaller text calls for shorter hours, safe housing, and women's participation in worker organizations.

Sourcing cues: Labor-union visual source; connects women's wage labor, workplace reform, and political voice.

Document 4

Author/Origin/Year/Place: Statement by a member of the All-India Women's Conference, 1946, Delhi.

Source Type: Organization statement.

“Women marched, taught, spun, picketed, and went to prison in the national struggle. Independence must not restore us to silence. The constitution must provide equal civil rights, education, and the vote, but laws alone will not change village custom, dowry burdens, or the belief that women belong only to the household.”

Sourcing cues: Women’s organization involved in nationalist and constitutional debates; distinguishes formal rights from social practice.

Document 5

Author/Origin/Year/Place: Plain-text table compiled by a United Nations research office, 1955.

Source Type: Data table.

Selected Women’s Voting Rights by Region, c. 1900–1955

Region / Country	Example	Approximate Pattern
New Zealand	National voting rights for women	before 1900
United Kingdom	Expanded women’s suffrage	after World War I
Turkey	Women’s voting rights	in the interwar period
India	Universal adult suffrage	adopted with independence
Mexico	National women’s suffrage	adopted in the 1950s
Several colonial territories	Rights often delayed	until late colonial or postcolonial reforms

Note on the table: Legal voting rights did not always produce equal representation in legislatures or equal influence within political parties.

Sourcing cues: International research perspective; useful for comparison across states but limited in measuring daily social equality.

Document 6

Author/Origin/Year/Place: Memoir excerpt by an Algerian woman who served as a courier during the war for independence, written in 1970, Algiers.

Source Type: Memoir excerpt.

“During the struggle, I carried messages under my clothes and crossed checkpoints where men were searched more closely. We were told that the revolution needed every daughter of the nation. After independence, some comrades thanked us, but others said politics was now for men with experience. I had risked prison for a country in which I still had to ask permission to speak.”

Sourcing cues: Retrospective account by a female participant in anti-colonial struggle; emphasizes both wartime participation and postwar exclusion.

Document 7

Author/Origin/Year/Place: Statement from a delegate at the International Women’s Year conference, 1975, Mexico City.

Source Type: Conference statement.

“Women’s political participation cannot be measured only by the vote. We must ask who owns land, who receives education, who controls wages, who sits in ministries, who speaks in unions, and who is protected by law. The experiences of women in newly independent countries, industrial states, and rural communities differ, but equality must include public power and daily life.”

Sourcing cues: International conference perspective; broadens political participation beyond suffrage and links gender equality to social and economic structures.

Scoring Guide:

Total Points: 7

Thesis / Claim — 1 point: Earns the point by making a historically defensible claim that evaluates the extent to which women's claims to political participation changed from c. 1900 to 1975. A strong thesis should establish a line of reasoning, such as arguing that women's claims expanded from suffrage and citizenship to broader demands for education, labor rights, constitutional equality, representation, and social power, while barriers in family, workplace, parties, and postcolonial states persisted.

Contextualization — 1 point: Earns the point by describing a broader historical context relevant to women's political participation, such as industrial labor, suffrage movements, nationalism, World War I, World War II, decolonization, socialist and labor movements, international organizations, constitutional reform, or global feminist activism.

Evidence from the Documents — 2 points: Earns 1 point by accurately using the content of at least three documents to address the prompt. Earns 2 points by using at least six documents to support an argument about suffrage, education, labor activism, nationalism, constitutional rights, postcolonial participation, international conferences, or continuing social barriers.

Evidence Beyond the Documents — 1 point: Earns the point by using at least one specific piece of relevant outside evidence not found in the documents, such as British suffragettes, World War I home-front labor, Soviet policies on women, Chinese Communist marriage reform, women in the Mexican Revolution, Simone de Beauvoir, the UN Commission on the Status of Women, second-wave feminism, or women's participation in Vietnam or Cuba.

Sourcing / Analysis of Documents — 1 point: Earns the point by explaining how or why the point of view, purpose, audience, or historical situation of at least three documents is relevant to the argument. Effective examples include explaining why suffrage petitioners appealed to lawmakers, why nationalist reformers linked women's education to independence, why a labor poster connected factory work to political voice, why memoirs may highlight postwar disappointment, or why an international conference broadened the meaning of political participation.

Complexity — 1 point: Earns the point by demonstrating a more complex understanding of women's political participation. This may include explaining both legal change and social continuity, comparing industrial, colonial, and postcolonial contexts, showing that nationalism opened opportunities but did not guarantee equality, or explaining that political participation expanded beyond voting to include labor, education, law, and representation.

Model Guidance:

A strong DBQ could argue that women's claims to political participation changed significantly from c. 1900 to 1975 by moving beyond suffrage toward broader claims about labor, education, constitutional equality, nationalism, and representation. Documents 1 and 5 are useful for suffrage and legal rights. Documents 2 and 4 connect women's participation to nationalism and education. Document 3 connects labor activism to political voice. Documents 6 and 7 show that wartime or revolutionary participation did not automatically produce equal postwar power and that international feminism broadened the meaning of political participation. Outside evidence could include British suffragettes, World War I labor, Chinese marriage reform, the UN Commission on the Status of Women, second-wave feminism, or women in revolutionary movements. Strong sourcing should compare petitions, speeches, labor propaganda, organizational statements, data tables, memoirs, and international conference rhetoric.

Expected Points:

APWH-LEQ8-001

Section: LEQ

Type: written

Unit: Unit 8 — Cold War and Decolonization

Period: c. 1900–present

Theme: ECN — Economic Systems

Historical Reasoning: Comparison

Source Type: Broad historical prompt with introductory statement

Prompt:

During the twentieth century, communist revolutions and socialist governments attempted to transform economic and social life. These transformations often included land reform, collectivization, state planning, campaigns against old elites, changes in gender or family policy, and efforts to build new forms of political loyalty.

Compare the effects of communist revolutions on economic and social structures in two states during the period c. 1900 to the present.

Scoring Guide:

Total Points: 6

Thesis / Claim — 1 point: Earns the point by making a historically defensible claim that compares the effects of communist revolutions on economic and social structures in two states during c. 1900 to the present. A strong thesis should identify a meaningful similarity and/or difference and establish a line of reasoning.

Contextualization — 1 point: Earns the point by describing a broader context relevant to communist revolutions, such as industrial capitalism, World War I, the Russian Revolution, imperial collapse, peasant inequality, anti-imperialism, World War II, the Cold War, Marxism-Leninism, or state-led modernization.

Evidence — 2 points: Earns 1 point by identifying at least two specific pieces of relevant evidence, such as Soviet collectivization, five-year plans, dekulakization, Chinese land reform, the Great Leap Forward, communes, Cuban land reform, Vietnamese collectivization, literacy campaigns, party-state control, or changes in women's legal status. Earns 2 points by using at least two pieces of evidence to support a comparison of effects.

Historical Reasoning — 1 point: Earns the point by using comparison to explain similarities and/or differences in the effects of communist revolutions. Strong responses might compare industrialization and collectivization, treatment of peasants and landlords, gender policy, education, state violence, party control, or the balance between economic modernization and social disruption.

Complexity — 1 point: Earns the point by demonstrating a nuanced understanding of communist revolutionary change. This may include explaining that communist revolutions could expand literacy, land access, or women's public roles while also producing coercion, famine, repression, or new bureaucratic hierarchies; or showing that effects differed depending on levels of industrialization, peasant society, war, foreign pressure, and leadership choices.

Model Guidance:

A strong LEQ should compare two states directly rather than narrating them separately. Useful comparisons might include the Soviet Union and China, China and Cuba, Vietnam and the Soviet Union, or Cuba and China. Evidence may include five-year plans, collectivization, land reform, communes, literacy campaigns, party control, changes in gender policy, famine, and repression. The best responses explain both similarities and differences in economic and social effects and avoid presenting communist revolutions as either entirely liberating or entirely destructive.

Expected Points:

SECTION 2 — SERIES DO-NOT-REPEAT BANK UPDATE — DO NOT IMPORT

SERIES DO-NOT-REPEAT BANK UPDATE — APWH-FRQ8

· APWH-SAQ8-001: Unit 1 — The Global Tapestry; c. 1200–1450; Ethiopia / Horn of Africa, Ethiopian highlands, Red Sea, Egypt, Arabia, and surrounding Muslim states; secondary text source with two modern historians; source perspectives contrast Solomonic Christian sacred kingship, church patronage, monasteries, and monumental culture with Red Sea trade, diplomacy, Coptic connections, and interaction with the wider Islamic and Indian Ocean worlds; historical development is medieval Ethiopian state-building through religion and regional connectivity; reasoning path compares interpretations of political authority and evaluates isolation versus connectedness; misconception targeted: medieval Ethiopia was either completely isolated or defined only by external trade rather than local Christian political culture.

· APWH-SAQ8-002: Unit 4 — Transoceanic Interconnections; c. 1450–1750; Ottoman North Africa / Algiers, western Mediterranean, Spanish-Ottoman rivalry, corsair networks, Tunis, and Istanbul; primary text source is an original Ottoman naval administrator report; source perspective is an imperial military-administrative official requesting supplies and advising cooperation with local notables; historical development is Ottoman maritime governance, naval rivalry, fortress supply, corsair activity, and local elite negotiation; reasoning path focuses on purpose, challenges of maritime/gunpowder imperial rule, and source limitations for local populations; misconception targeted: Ottoman power was only land-based and did not depend on maritime strategy or negotiated coastal authority.

· APWH-SAQ8-003: Unit 7 — Global Conflict; c. 1900–present; Soviet Union during World War II, including Leningrad, Moscow, Kharkiv, Ural industrial relocation, factory labor, and women’s wartime production; non-text source type is a described Soviet wartime factory poster; visual/data/map pattern includes women operating lathes, tanks leaving a factory, rail lines eastward, and a slogan linking shifts at machines to fighting the invader; historical development is total war, home-front mobilization, propaganda, women’s industrial labor, and relocation of production; reasoning path is causation from total war to social and economic mobilization and analysis of propaganda purpose; misconception targeted: World War II was fought only by soldiers and did not require mass civilian labor and state-directed production.

· APWH-DBQ8-001: Unit 9 — Globalization; c. 1900–present; New Zealand, Egypt, Japan, India, Algeria, Mexico City, and broader international women’s movements; DBQ topic is women’s claims to political participation changing from c. 1900 to 1975; document types include suffrage petition, public lecture, described labor-union poster, women’s organization statement, UN research table, anti-colonial participant memoir, and international conference statement; document perspectives include suffrage activists, nationalist education reformers, women workers/labor unions, Indian constitutional women’s organizations, international researchers, Algerian revolutionary women, and global feminist conference delegates; main argument paths include voting rights, education, labor rights, nationalism, constitutional equality, postcolonial exclusion, international feminism, and expansion of political participation beyond suffrage; outside evidence possibilities include British suffragettes, World War I home-front labor, Soviet women’s policies, Chinese Communist marriage reform, Mexican Revolution, Simone de Beauvoir, UN Commission on the Status of Women, second-wave feminism, women in Vietnam or Cuba, and International Women’s Year; sourcing opportunities include petition audience, nationalist reform rhetoric, labor poster persuasion, constitutional organization goals, limits of comparative data, retrospective memoir disappointment, and international conference broadening of equality.

· APWH-LEQ8-001: Unit 8 — Cold War and Decolonization; c. 1900–present; comparative communist revolutions and socialist states such as Soviet Union, China, Cuba, Vietnam, and related Cold War contexts; LEQ topic is effects of communist revolutions on economic and social structures in two states; historical reasoning process is comparison; evidence categories include Soviet collectivization, five-year plans, dekulakization, Chinese land reform, communes, Great

Leap Forward, Cuban land reform, Vietnamese collectivization, literacy campaigns, party-state control, gender policy, famine, repression, and new bureaucratic hierarchies; complexity path compares modernization, land redistribution, literacy, gender change, party control, coercion, famine, and repression while explaining differences based on industrialization level, peasant society, war, foreign pressure, and leadership choices; misconception targeted: communist revolutions had identical effects everywhere or were either entirely emancipatory or entirely destructive.
