

SECTION 1 — IMPORT-READY SOURCE FILE

AP World History: Modern Free-Response Practice Exam 12

APWH-SAQ12-001

Section: SAQ

Type: written

Unit: Unit 1 — The Global Tapestry

Period: c. 1200–1450

Theme: ENV — Humans and the Environment

Historical Reasoning: Mixed Historical Reasoning

Source Type: Secondary text source

Prompt:

Source 1: Historian Marisol Quispe, “Irrigation and Authority on the Andean Coast,” modern historical interpretation, 2021.

“The power of the Chimú state depended on its ability to organize labor and water in an arid coastal environment. Irrigation canals, planned urban spaces at Chan Chan, craft workshops, and storage systems show that political authority was closely tied to environmental management and control over specialized production.”

Source 2: Historian Daniel Reeves, “Vertical Exchange in the Andes,” modern historical interpretation, 2020.

“Andean societies were not shaped only by coastal irrigation or single urban centers. Political power also depended on linking different ecological zones: coast, valley, highlands, and pasturelands. Exchange of maize, potatoes, textiles, camelids, fish, and metals connected communities across difficult terrain.”

- (a) Identify one difference between the two historians’ interpretations of Andean state-building.
- (b) Describe one specific historical development that could be used to support one of the interpretations.
- (c) Explain one way Andean state-building during c. 1200–1450 was similar to or different from state-building in another region during the same period.

Scoring Guide:

Total Points: 3

- (a) 1 point: Identifies a clear difference between the interpretations, such as Source 1 emphasizing coastal irrigation, urban planning, and craft production while Source 2 emphasizes exchange across ecological zones and regional integration.
- (b) 1 point: Describes a relevant development, such as Chan Chan, Chimú irrigation canals, craft workshops, storage facilities, coastal maize production, camelid exchange from highlands, movement of potatoes or textiles, or political control over specialized labor.
- (c) 1 point: Explains a valid similarity or difference with another region, such as Angkor, Song China, Cahokia, Mali, Great Zimbabwe, or Southeast Asia, using specific evidence about irrigation, agriculture, environmental adaptation, exchange networks, labor organization, or political authority.

Model Guidance:

A strong answer should show that Andean power depended on environmental adaptation and regional exchange, not only conquest or urban construction. Strong responses should use specific

evidence from the Andes and compare it to another society through a clear category, such as irrigation, agriculture, labor, religion, or trade.

Expected Points:

3

APWH-SAQ12-002

Section: SAQ

Type: written

Unit: Unit 4 — Transoceanic Interconnections

Period: c. 1450–1750

Theme: GOV — Governance

Historical Reasoning: Sourcing / POV / Purpose / Audience

Source Type: Primary text source

Prompt:

Source: Message from a Mapuche leader to a Spanish governor near the Biobío River, southern Chile, c. 1642. This excerpt is original but modeled on early colonial frontier diplomacy.

“You ask that our people accept forts, priests, and royal officials as signs of peace. We answer that peace cannot be built by placing soldiers on our fields or demanding service from our young men. Let trade be open at the river, and let captives be returned by both sides. If the king across the sea wishes friendship, his captains must know that friendship is not tribute. We will speak in council, but we will not become servants.”

(a) Identify the likely purpose of the message.

(b) Explain how the message reflects one challenge faced by Spanish colonial authorities in the Americas.

(c) Explain one limitation of the source as evidence for relations between Indigenous peoples and Spanish colonizers.

Scoring Guide:

Total Points: 3

(a) 1 point: Identifies a plausible purpose, such as rejecting Spanish demands, negotiating peace, opposing forts and forced labor, insisting on trade and captive exchange, or defending Mapuche autonomy.

(b) 1 point: Explains a relevant colonial challenge, such as Indigenous resistance, difficulty controlling frontier regions, limits of military conquest, negotiation with Indigenous leaders, conflicts over labor demands, or the need to balance missions, forts, trade, and diplomacy.

(c) 1 point: Explains a valid limitation, such as the source representing one Mapuche leader’s diplomatic position rather than all Mapuche communities, Spanish settlers, missionaries, enslaved people, women, or rival Indigenous groups; or noting that diplomatic messages may emphasize unity and autonomy while omitting internal divisions.

Model Guidance:

A strong response should use the source as evidence of negotiated frontier politics. The message shows that Spanish authority was not complete and that Indigenous leaders could bargain, resist, and define peace on their own terms. Strong answers should avoid portraying Indigenous peoples only as victims or only as isolated warriors without diplomacy.

Expected Points:

3

APWH-SAQ12-003

Section: SAQ

Type: written

Unit: Unit 9 — Globalization

Period: c. 1900–present

Theme: SIO — Social Interactions and Organization

Historical Reasoning: Causation

Source Type: Non-text source

Prompt:

Source: Description of a refugee-route map printed by a humanitarian organization, 1981.

The map shows arrows leaving Vietnam, Laos, and Cambodia by land and sea. Some arrows cross into Thailand, Malaysia, Hong Kong, and the Philippines; others continue toward Australia, France, Canada, and the United States. Small symbols mark refugee camps, rescue ships, and resettlement offices. A caption reads: “War, Revolution, and Flight: Indochinese Refugees Seek Safety across the Pacific World.”

- (a) Identify one cause of the migration pattern shown on the map.
- (b) Explain one effect of refugee migration on receiving states or international organizations.
- (c) Explain one way the map reflects broader patterns of globalization in the late twentieth century.

Scoring Guide:

Total Points: 3

(a) 1 point: Identifies a valid cause, such as war in Vietnam, communist revolutions in Indochina, persecution, political reeducation, economic disruption, regional conflict, fear of retaliation, or the aftermath of U.S. and Cold War involvement in Southeast Asia.

(b) 1 point: Explains a valid effect, such as refugee camps, international resettlement programs, humanitarian aid, immigration policy debates, diaspora communities, cultural change in receiving countries, or pressure on international organizations to coordinate relief and relocation.

(c) 1 point: Explains a broader globalization pattern, such as transoceanic migration, humanitarian networks, international law and refugee agencies, diaspora formation, Cold War-linked displacement, air and sea transportation, or connections between local conflicts and global resettlement.

Model Guidance:

A strong response should connect the map’s routes to both regional conflict and global migration systems. The arrows, camps, ships, and resettlement offices show that refugee movement was not only local; it involved humanitarian organizations, receiving states, and transpacific diaspora formation. Strong answers should avoid treating refugees as voluntary economic migrants without acknowledging war and political displacement.

Expected Points:

3

APWH-DBQ12-001

Section: DBQ

Type: written

Unit: Unit 6 — Consequences of Industrialization

Period: c. 1750–1900

Theme: ECN — Economic Systems

Historical Reasoning: Causation

Source Type: Seven-document set

Prompt:

Evaluate the extent to which mechanized textile production and global cotton demand transformed labor systems and regional economies from c. 1750 to 1900.

Document 1

Author/Origin/Year/Place: Petition from handloom weavers to a local revenue official, Bengal, 1817.

Source Type: Artisan petition.

“Our fathers wove cloth for merchants who knew our villages and paid advances before the season. Now imported machine-made cloth sells cheaply in the bazaar, and Company agents demand payments while thread prices rise. Some families abandon the loom for field labor; others borrow money and fall into debt. The skill of many years has become a burden.”

Sourcing cues: Artisan perspective; emphasizes deindustrialization, debt, and competition from machine-made textiles.

Document 2

Author/Origin/Year/Place: Speech by a textile mill owner to a manufacturers’ association, Manchester, 1834.

Source Type: Business speech.

“The future of industry depends upon uninterrupted cotton supply, disciplined factory labor, and access to markets abroad. Machines allow one town to clothe millions, but only if raw cotton arrives cheaply and if foreign governments do not close their ports to our goods.”

Sourcing cues: Industrial capitalist perspective; emphasizes machinery, raw materials, labor discipline, and export markets.

Document 3

Author/Origin/Year/Place: Letter from an Egyptian village headman to a provincial official during the cotton boom, 1863.

Source Type: Local administrative letter.

“Merchants offer high prices for cotton, and officials say the crop will enrich the country. Yet cotton takes land and water that once grew grain for village use. Laborers are called to clean canals, and taxes are assessed before the harvest is sold. We do not oppose profit, but hunger follows when every field is ordered toward the market.”

Sourcing cues: Local rural official; shows tension between export agriculture, taxation, irrigation labor, and subsistence needs.

Document 4

Author/Origin/Year/Place: Export summary compiled by a commercial newspaper, 1860–1885.

Source Type: Plain-text data table.

Selected Cotton-Related Economic Patterns, 1860–1885

Region Reported Pattern

United States Civil War disrupts cotton exports in the 1860s

Egypt Cotton exports increase sharply during the American Civil War
India Raw cotton exports rise while handloom producers face pressure
Brazil Cotton and textile production expand unevenly by region
Russia / Central Asia Officials encourage cotton cultivation for imperial textile needs

Note on the table: Merchants reported that disruptions in one cotton-producing region encouraged expansion or investment in other regions.

Sourcing cues: Commercial newspaper perspective; highlights market shifts but compresses regional social differences.

Document 5

Author/Origin/Year/Place: Report from a Russian official in Turkestan to the Ministry of Finance, 1889.

Source Type: Government report.

“Cotton cultivation in the irrigated districts should be expanded to reduce dependence on foreign supply. Rail connections and credit will encourage growers to plant more cotton for Russian mills. Care must be taken that grain does not disappear from local markets, but the empire cannot remain at the mercy of distant producers.”

Sourcing cues: Imperial official perspective; links cotton cultivation to state economic strategy and imperial integration.

Document 6

Author/Origin/Year/Place: Description of a photograph of a cotton mill in Bombay, 1892.

Source Type: Described photograph.

The photograph shows a large spinning room filled with rows of machines. Men and women stand near the frames while a supervisor watches from a raised platform. Open windows let in light, but the room appears crowded. A caption printed below the photograph reads: “Indian Capital and Modern Industry: Bombay Cotton Mills.”

Sourcing cues: Visual source likely produced for commercial or civic promotion; shows industrial labor and Indian-owned or locally financed factory production.

Document 7

Author/Origin/Year/Place: Editorial in an Egyptian reform newspaper, Cairo, 1895.

Source Type: Newspaper editorial.

“Cotton has brought money, railways, and foreign attention, but it has also tied the countryside to debts and prices set beyond Egypt. A nation cannot build strength from one crop alone. Schools, workshops, and local manufactures must grow, or the wealth of cotton will pass through our hands to bankers and merchants elsewhere.”

Sourcing cues: Reformist newspaper perspective; critiques dependency on export agriculture and calls for diversified development.

Scoring Guide:

Total Points: 7

Thesis / Claim — 1 point: Earns the point by making a historically defensible claim that evaluates

the extent to which mechanized textile production and global cotton demand transformed labor systems and regional economies from c. 1750 to 1900. A strong thesis should establish a line of reasoning, such as arguing that cotton industrialization reorganized artisan labor, factory work, export agriculture, imperial policy, and regional dependency, while older rural labor and subsistence concerns persisted.

Contextualization — 1 point: Earns the point by describing a broader historical context relevant to cotton and industrialization, such as the Industrial Revolution, mechanized spinning and weaving, European imperialism, the growth of global markets, plantation agriculture, the American Civil War, steam transportation, colonial rule in South Asia, or state-sponsored industrialization.

Evidence from the Documents — 2 points: Earns 1 point by accurately using the content of at least three documents to address the prompt. Earns 2 points by using at least six documents to support an argument about handloom decline, factory labor, raw cotton supply, export agriculture, rural taxation, imperial cotton policy, market disruption, Bombay mills, or economic dependency.

Evidence Beyond the Documents — 1 point: Earns the point by using at least one specific piece of relevant outside evidence not found in the documents, such as the spinning jenny, power loom, cotton gin, Manchester textile mills, slavery in the American South, the American Civil War cotton famine, British colonial economic policy in India, Egyptian cotton under Muhammad Ali or his successors, or Japanese textile industrialization.

Sourcing / Analysis of Documents — 1 point: Earns the point by explaining how or why the point of view, purpose, audience, or historical situation of at least three documents is relevant to the argument. Effective examples include explaining why weavers emphasized debt and skill loss, why mill owners prioritized cheap cotton and markets, why village headmen worried about food supply, why commercial tables highlight market shifts, why Russian officials framed cotton as imperial strategy, or why reform newspapers criticized dependency.

Complexity — 1 point: Earns the point by demonstrating a more complex understanding of cotton and industrialization. This may include explaining that industrialization created both factory employment and artisan displacement, that cotton demand linked distant regions unevenly, that states tried to secure supply through imperial policy, or that export growth could bring railways and revenue while increasing dependency and food insecurity.

Model Guidance:

A strong DBQ could argue that mechanized textile production and global cotton demand transformed labor and regional economies by weakening some artisan producers, expanding factory work, increasing demand for raw cotton, encouraging export monoculture, and prompting states to integrate cotton-growing regions into imperial economies. Documents 1 and 6 are useful for comparing handloom decline and factory production. Documents 2, 4, and 5 show industrial demand and global market shifts. Documents 3 and 7 show rural and nationalist concerns about cotton dependency. Outside evidence could include the spinning jenny, power loom, cotton gin, Manchester, slavery in the American South, the American Civil War cotton famine, or British colonial policy in India. Strong sourcing should compare artisans, industrialists, village officials, commercial newspapers, imperial officials, visual promoters, and reform journalists.

Expected Points:

7

APWH-LEQ12-001

Section: LEQ

Type: written

Unit: Unit 8 — Cold War and Decolonization

Period: c. 1900–present

Theme: GOV — Governance

Historical Reasoning: Causation

Source Type: Broad historical prompt with introductory statement

Prompt:

After 1945, Cold War rivalries shaped conflicts in Asia, Africa, Latin America, and the Middle East. Superpowers often supplied weapons, money, training, or diplomatic support, but many conflicts also grew from local struggles over decolonization, land, ideology, ethnicity, resources, or state power.

Evaluate the extent to which Cold War rivalries caused conflicts in the developing world from c. 1945 to 1991.

Scoring Guide:

Total Points: 6

Thesis / Claim — 1 point: Earns the point by making a historically defensible claim that evaluates the extent to which Cold War rivalries caused conflicts in the developing world from c. 1945 to 1991. A strong thesis should establish a line of reasoning that weighs superpower rivalry against local causes.

Contextualization — 1 point: Earns the point by describing a broader context relevant to Cold War conflicts, such as the end of World War II, decolonization, the division between capitalist and communist blocs, nuclear rivalry, containment, Soviet support for socialist movements, U.S. anti-communist policy, or newly independent states seeking sovereignty.

Evidence — 2 points: Earns 1 point by identifying at least two specific pieces of relevant evidence, such as the Korean War, Vietnam War, Soviet-Afghan War, Cuban Revolution, Angolan Civil War, Congo Crisis, Guatemalan coup, Sandinista Revolution, Arab-Israeli conflicts, or U.S. and Soviet military aid. Earns 2 points by using at least two pieces of evidence to support an argument about causation.

Historical Reasoning — 1 point: Earns the point by using causation to explain how Cold War rivalry contributed to conflicts and how local causes also mattered. Strong responses might explain that superpowers intensified conflicts through aid, intervention, and ideological framing, while local actors pursued their own goals related to independence, land reform, ethnic rivalry, anti-colonialism, nationalism, or regime survival.

Complexity — 1 point: Earns the point by demonstrating a nuanced understanding of Cold War conflict. This may include explaining that some conflicts became Cold War proxy wars after beginning locally, that local leaders used superpower rivalry to gain aid, that ideology interacted with nationalism and decolonization, or that superpower involvement differed by region and over time.

Model Guidance:

A strong LEQ should not treat developing-world conflicts as simply controlled by the United States and Soviet Union. Useful evidence might include Korea, Vietnam, Afghanistan, Angola, Congo, Guatemala, Cuba, Nicaragua, and U.S. or Soviet military aid. Strong answers should explain how Cold War rivalry intensified or internationalized conflicts while also showing that local causes—decolonization, land reform, nationalism, ethnic tensions, resources, and state power—were often central.

Expected Points:

6

SECTION 2 — SERIES DO-NOT-REPEAT BANK UPDATE — DO NOT IMPORT

SERIES DO-NOT-REPEAT BANK UPDATE — APWH-FRQ12

· APWH-SAQ12-001: Unit 1 — The Global Tapestry; c. 1200–1450; Andean coast and highlands / Chimú state, Chan Chan, irrigation canals, craft workshops, ecological zones, coast-valley-highland-pasture exchange, maize, potatoes, textiles, camelids, fish, and metals; secondary text source with two modern historians; source perspectives contrast coastal irrigation, urban planning,

labor organization, storage, and craft specialization with vertical ecological exchange and regional integration across difficult terrain; historical development is Andean environmental adaptation and state-building before Inca imperial consolidation; reasoning path compares environmental-management and ecological-exchange interpretations; misconception targeted: Andean state-building depended only on conquest or cities rather than irrigation, labor, production, and ecological integration.

· APWH-SAQ12-002: Unit 4 — Transoceanic Interconnections; c. 1450–1750; Mapuche-Spanish frontier / southern Chile, Biobío River, Spanish forts, priests, royal officials, trade, captive exchange, and Indigenous councils; primary text source is an original Mapuche diplomatic message to a Spanish governor; source perspective is an Indigenous leader negotiating peace while rejecting tribute, forced service, and military occupation; historical development is Indigenous resistance and frontier diplomacy within Spanish colonial expansion; reasoning path focuses on purpose, limits of colonial power, and source limitations for diverse Indigenous-colonial relations; misconception targeted: Indigenous peoples in the Americas were only conquered subjects rather than diplomatic actors capable of negotiation and sustained resistance.

· APWH-SAQ12-003: Unit 9 — Globalization; c. 1900–present; Indochina / Vietnam, Laos, Cambodia, Thailand, Malaysia, Hong Kong, Philippines, Australia, France, Canada, United States, Pacific refugee routes, camps, rescue ships, and resettlement offices; non-text source type is a described humanitarian refugee-route map; visual/data/map pattern includes arrows by land and sea, refugee camp symbols, rescue ships, resettlement offices, and transpacific destinations; historical development is postwar and post-revolutionary Indochinese refugee movement and diaspora formation; reasoning path is causation from war/revolution to refugee migration and globalization through humanitarian networks and resettlement; misconception targeted: late twentieth-century refugees were simply voluntary economic migrants rather than displaced people shaped by war, revolution, Cold War politics, and international resettlement systems.

· APWH-DBQ12-001: Unit 6 — Consequences of Industrialization; c. 1750–1900; Bengal, Manchester, Egypt, United States, India, Brazil, Russia/Central Asia, Turkestan, Bombay, and global cotton markets; DBQ topic is mechanized textile production and global cotton demand transforming labor systems and regional economies from c. 1750 to 1900; document types include Bengal handloom weaver petition, Manchester mill owner speech, Egyptian village headman letter, commercial cotton-pattern data table, Russian Turkestan government report, described Bombay cotton mill photograph, and Egyptian reform newspaper editorial; document perspectives include artisans, industrial capitalists, rural officials, commercial market observers, imperial economic planners, visual promoters of factory industry, and reformist journalists; main argument paths include handloom decline, machine-made cloth, raw cotton demand, factory discipline, export agriculture, food insecurity, taxation, market disruptions, imperial cotton policy, Bombay industrialization, and dependency on global prices; outside evidence possibilities include spinning jenny, power loom, cotton gin, Manchester mills, slavery in the American South, American Civil War cotton famine, British colonial policy in India, Egyptian cotton under Muhammad Ali or successors, and Japanese textile industrialization; sourcing opportunities include artisan debt perspective, capitalist market priorities, village subsistence concerns, commercial table compression, Russian imperial strategy, photograph as civic/commercial promotion, and reformist critique of monocrop dependency.

· APWH-LEQ12-001: Unit 8 — Cold War and Decolonization; c. 1900–present; developing-world Cold War conflicts in Asia, Africa, Latin America, and the Middle East, including Korea, Vietnam, Afghanistan, Cuba, Angola, Congo, Guatemala, Nicaragua, and broader superpower military/diplomatic aid; LEQ topic is Cold War rivalries as causes of conflicts in the developing world from c. 1945 to 1991; historical reasoning process is causation; evidence categories include containment, Soviet support for socialist movements, U.S. anti-communist policy, Korean War, Vietnam War, Soviet-Afghan War, Cuban Revolution, Angolan Civil War, Congo Crisis, Guatemalan coup, Sandinista Revolution, Arab-Israeli conflicts, military aid, decolonization, land

reform, nationalism, ethnicity, resources, and state power; complexity path weighs superpower rivalry against local causes and explains proxy-war escalation, local agency, ideology, nationalism, decolonization, and regional variation; misconception targeted: developing-world conflicts were simply controlled by superpowers or were purely local with no Cold War internationalization.
